Revolutionary interactive 3D Taekwondo App “Protrain Taekwondo” has launched on iTunes App Store

ProTrain Taekwondo is a free iPad app which uses motion capture of Kukkiwon registered 8th Dan [Grand Master Tony Vohra](#), to create the first interactive 3D Taekwondo app specifically designed for World Taekwondo Federation (WTF) practitioners, available on the [appstore](#).

Simon Alexander, one the originators of the app says “as a Taekwondo student looking at training companions, I couldn’t find an app which was both comprehensive and easy to understand - it seemed to be a case of Either, Or... but not any more!”

Users can control the camera angle in real time and pause, replay moves or jump into in-depth technical explanations at any time, creating a rich reference that can be consulted at any angle imaginable.

ProTrain Taekwondo’s 1st app release focuses on Sa Jang, the 4th form (Poomsae), and is available for [free download now](#). Once downloaded the user can choose to purchase the additional content and instructional features or continue to use the Sa Jang form for free.
